NETWORKING and DISSEMINATION

One key aspect of LIFE CONCERT REACH is the **DISSEMINATION** of ***IN SILICO*** **TOOLS** and the project's **OUTCOME**

- **Workshops organisation**
- **Posters and presentations**
- **Articles** and **scientific publications**
- **Web-seminars**
- **Trainings**
- **Published case-studies**
- **E-meetings**

E-meetings Purpose and content

Short **e-meetings** (ca. 2 hours) are planned as **follow-up to today's workshop** for discussing:

- How to improve QSAR results documentation for preparing better REACH dossier
- How to integrate multiple *in silico*-generated results using WoE approach
- OCHEM open source feedback: which additional features are needed?
- How to use data from ECHA registration dossiers, for *in silico* models development

More topics will be collected during the workshop

Updated agenda based on workshop outcome

CONCERTREACH
CONCERTING EXPERIMENTAL DATA AND IN SILICO MODELS FOR REACH
LIFE17 GIE/IT/000461

Short **e-meetings** (ca. 2 hours) are planned as **follow-up to today's workshop**

Proposed dates:	Tuesday, Nov 9th 10:00 – 12:00 CET	Thursday, Nov 11th 13:00 – 15:00 CET

Topics and registration: qsar-event@knoell.com

Proposed topics:

- How to use data from ECHA registration dossiers (confidentiality issue), for *in silico* models development
- How to integrate multiple *in silico*-generated results using WoE approach
- Use QSAR in support of read-across

- How to improve QSAR results documentation for preparing better REACH dossier
- OCHEM open source feedback: which additional features are needed?
- How to integrate and consider metabolism in QSAR modelling and/or QSAR predictions
